0.1 Notizen

```
% Spezialpakete
\usepackage{tikz}
\usepackage{fp}
\usepackage{tikz}
\usepackage{xcolor}
% TikZ-Bibliotheken
\usetikzlibrary{arrows}
\usetikzlibrary{shapes}
\usetikzlibrary{decorations.pathmorphing}
\usetikzlibrary{decorations.pathreplacing}
\usetikzlibrary{decorations.shapes}
\usetikzlibrary{decorations.text}
```

Command:

```
\tikz[options]{tikz commands}
```

oder

```
\begin{tikzpicture}
  blabla
\end{tikzpicture}
```

- Innerhalb der tikzpicture-Umgebung keine leeren Zeilen!
- Wenn keine Grösse angegeben, werden die Werte in Klammern als *cm* interpretiert.
- Das Koordinatensystem beginnt in der unteren linken Ecke der Arbeitsfläche.
- Benutze nicht Einheiten, sondern skaliere das Gesamtbild. Und falls nötig, zeige den Rechteck der Arbeitsfläche an.

```
\usetikzlibrary{backgrounds}
\begin{tikzpicture}[scale=.8, show background rectangle]
```

- Falls Text in Nodes vorhanden ist: benutze

```
\begin{tikzpicture}[scale=.9, transform shape]
```

Transform shape: Damit Node-Text mitskaliert wird.

1 Basics

1.1 Gerade Linien zeichnen, relative Koordinaten

1.2 Pfeile

 `\draw[->]`

 `\draw[dotted,>->>]`

 `\draw[|<->|]`

 `\draw[loosely dashed]`

 `\draw[densely dotted]`

 `\draw[->](0,0)..controls(.4,-.4)..(2,0)`

1.3 Polarkoordinaten; Geschlossene Figur

Polarkoordinaten: (winkel:radius). Winkel auch negativ möglich
Zum Anfangspunkt verbinden: `-- cycle;`

1.4 Einfache Figuren

2 Komplexeres

2.1 Fills

2.2 Clipping und Scope

After a clip command, all subsequent drawings are clipped, only the parts inside the clipping region are drawn.

Use the scope environment to restrict the effect of clipping.

2.3 Kurvenlinien

2.4 Nodes

```
\node[Options] (node name) at (x,y) {TeX content of node}
```

3 Varia

3.1 grid

3.2 Axes

3.3 Color fillings

4 Plots

Braucht `\usepackage{pgfplots}`

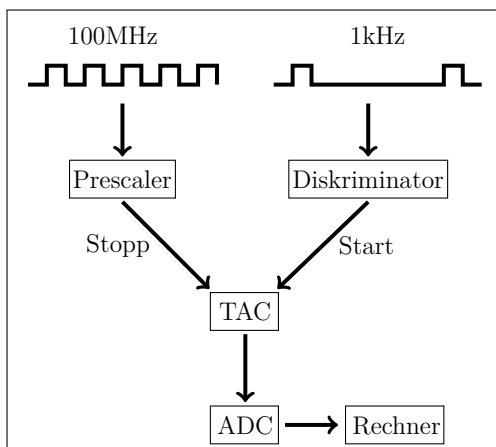

5 Meine Zeichnungen

5.1 Praktikumsbericht Kern- und Teilchenphysik: Positronenvernichtung

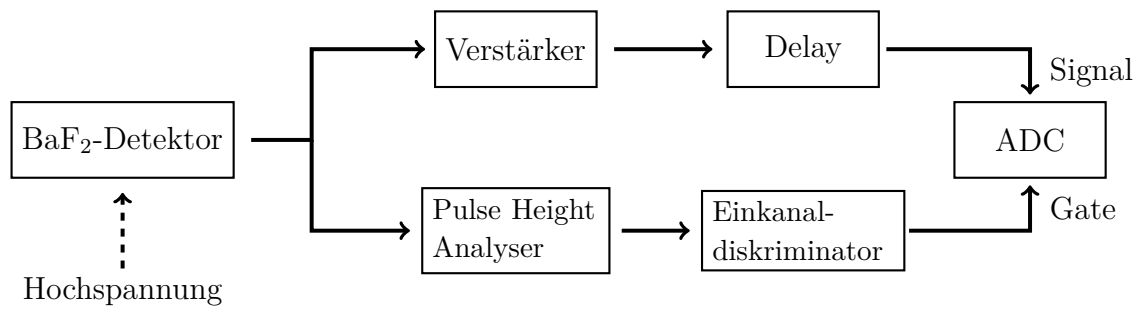

5.1.1 1

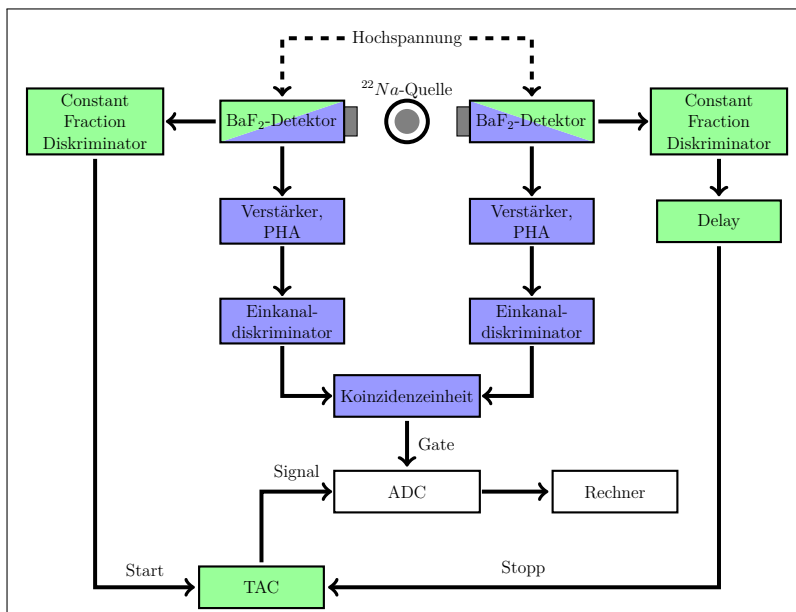

5.1.2 2

5.1.3 3

5.1.4 4

5.2 Proseminar Theoretische Physik: The Theory of Stellar Evolution

5.2.1 1

5.2.2 2

5.3 HPC 1b Slides

P_6	P_7	P_8
P_3	P_4	P_5
P_0	P_1	P_2

Processor distribution
for a 'square' execution

P_0	P_1	P_2	P_3
-------	-------	-------	-------

Processor distribution
for a 'linear' execution

5.4 Bachelor thesis

5.4.1 Estimating Boundaries

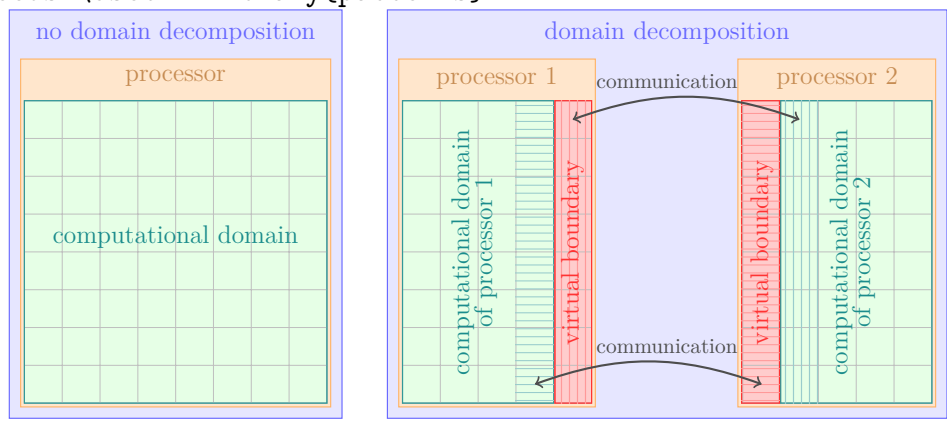

5.4.2 Potentials for exclusively bound particles

5.4.3 Domain Decomposition

needs \usetikzlibrary{patterns}

5.5 Master Thesis

5.5.1 Merger Tree

5.5.2 Fracture

5.6 Hydro Boundary Conditions

5.6.1 Periodic

5.6.2 Wall

5.6.3 Transmissive
